

Rekord, 25 February 2005

The University of Pretoria recently inaugurated a Brewing Technology Lab at their engineering department. Guests were treated to American Pale Ale, brewed by Mike Heydenrych from the UP's Department of Chemical Engineering. The brewery teaches students a hands-on science approach, through exposing them to the smells, sounds, tastes and textures of brewing and was sponsored by SAB (South African Breweries). At the hand-over were in front Malcolm du Toit, senior trade brewer from SAB Miller, Mlamuli Buthelezi, general manager, Rosslyn Brewery, SAB Miller and Professor Roelf Sandenberg, Dean of the Engineering, Built Environment and IT (EBIT) faculty. At the back are Evelyn Modise, public relations officer Rosslyn Brewery, SAB Miller and Mike Heydenrych from the Department of Chemical Engineering, UP. **Photo: Philip Bruwer**
